

```
GNU nano 7.2
#include <stdio.h>
#include <string.h>

int main() {
    char input[100];

    while (1) {
        printf("Enter a command (type exit to quit): ");
        fgets(input, sizeof(input), stdin);

        input[strcspn(input, "\n")] = '\0';

        if (strcmp(input, "exit") == 0) {
            printf("Exiting...\n");
            break;
        }

        printf("You entered: %s\n", input);
    }

    return 0;
}
